Identity Programs Aren't Broken Just 20 Years Behind the Attacker

From checklist hygiene to hyper prioritized Identity Risk Management

Qualys ROCon 26
The Risk Operations Conference
EMEA

Attackers target identity first.

Identity is the *most exploited* - and yet **least quantified** - attack surface.

IDENTITY IS THE CONTROL PLANE.

HYBRID ATTACK VECTORS

34%

of breach vectors combine

identity weaknesses · CVEs · misconfigurations

74%	50:1	$4.88M
breaches involve credential misuse	machine-to-human identity ratio	avg identity-driven breach

2025 Verizon Data Breach Investigations Report

Most identity programs still operate the way they did 20 years ago.

Qualys ROCon 26 The Risk Operations Conference EMEA

Hygiene without context

- x No visibility into sprawl across hybrid stacks
- x Blind to compromise which is **persistent**
- x Treats AD, Entra, and IdPs as separate audits
- x Quarterly cycles, weeks behind the attacker

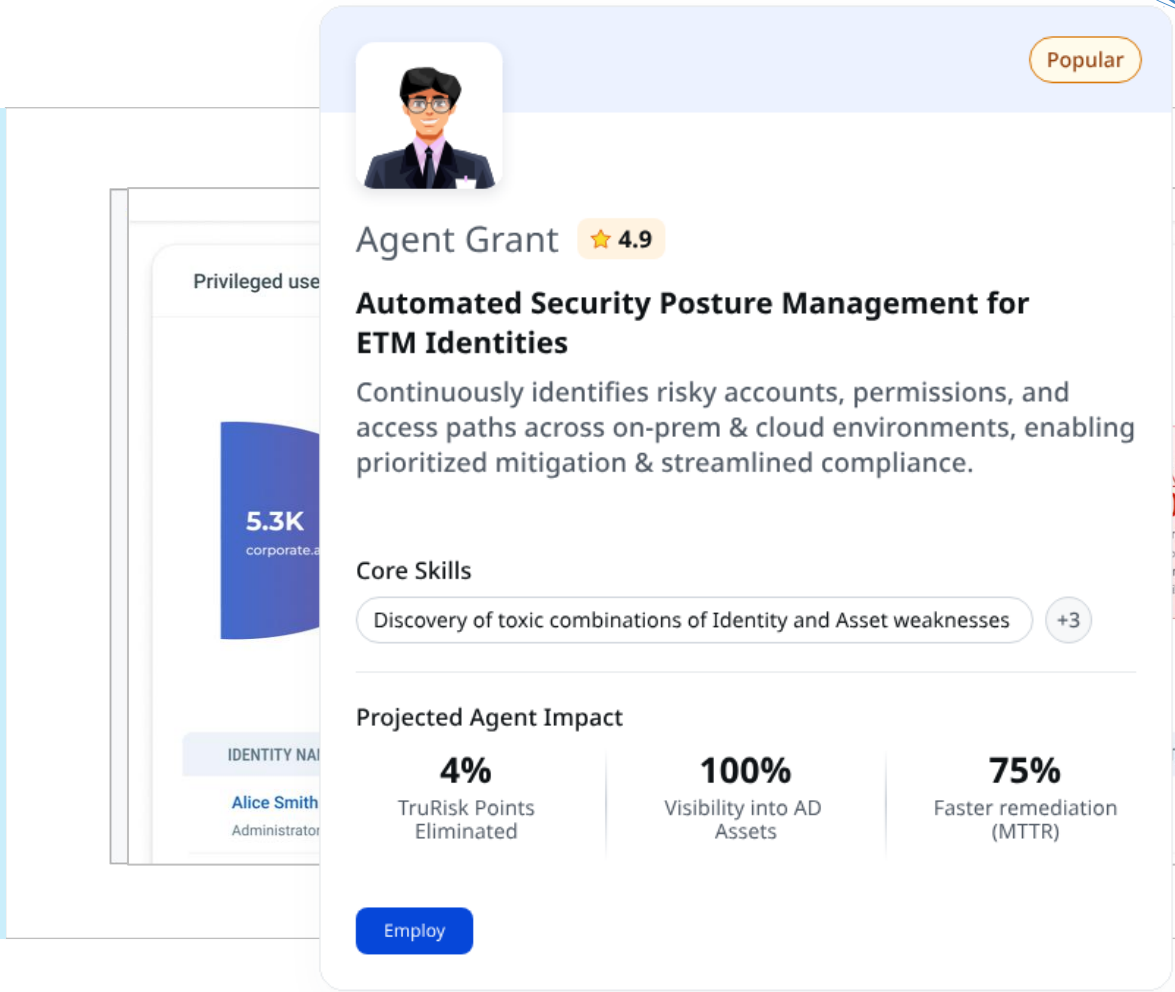

Introducing ETM Identity

Orchestrated with **Agent Grant** – the identity domain-specific Agentic AI fabric across your identity ROC.

Qualys ROCon 26 The Risk Operations Conference EMEA

Consolidates identity posture across your attack surface to ***measure***, ***communicate***, and ***eliminate*** identity risks.

- **Discover** every identity
- **Unify** risk telemetry
- **Correlate** with assets & threat intel
- **Prioritize** with business context
- **Validate** exploitable attack paths
- **Eliminate** with proof

Critical

TruRisk™ Score

Convert identity risk signals into prioritized, business-impact actions.

Correlate Surface toxic combinations linking identity, asset.

Actionable insight cards like Admin with weak password on public webservers with CISA KEV

Expose hidden AD relationships across domain and lateral routes to prioritize attack paths.

Visualize privileges, GPO influence, cross-domain across All Risk Factors

Protect Crown Jewels by focusing on highest-impact routes ranked by TruRisk™

One-click identity fixes, patch, mitigate with validation

Let's take a closer look with a demo

One solution for unified identity risk operations

Qualys ROCon 26
The Risk Operations Conference
EMEA

ONE

platform.
One risk language.
One operations workflow.

100% | audit-ready evidence

24x7 | continuous integrity monitoring

Zero | extra silos to manage

Cut tool sprawl with unified risk telemetry

Make faster decisions with one risk language

Eliminate the most exploitable attack paths first
