

Qualys Policy Audit

From Detection to Remediation to
Audit Readiness with AI-Powered Compliance

In the current Frontier AI era, misconfigurations can now be identified, chained into exploitable control failures, and weaponized in hours and yet compliance teams are still managing audit preparation with spreadsheets and scattered processes. This creates a cascade of problems with manual evidence collection that leaves gaps, hidden control failures that go undetected, and last-minute audit stress that cannot possibly keep pace with machine-speed threats.

AI-Driven Compliance Readiness

Traditional compliance is built for a world that no longer exists, relying on periodic audits, static controls, and manual evidence collection that leave organizations exposed between audits. Qualys Policy Audit redefines this approach with continuous compliance, an always-on, AI-driven model that unifies real-time discovery, machine-speed misconfiguration detection, and risk-based prioritization with automated remediation using Audit Fix. Instead of chasing audits, organizations operate in a constant state of readiness where compliance gaps are identified, prioritized, and resolved before they become risk or audit findings.

Qualys Policy Audit delivers these outcomes through a continuous compliance workflow

Step 1: Discover everything that matters

Continuously identify servers, middleware, databases, and software across environments, automatically classifying critical assets and uncovering compliance gaps in real time.

Proven Outcomes

90%

less manual effort
by eliminating
spreadsheet-driven
evidence collection
with continuous,
automated reporting.

95%

fewer audit failures
as control gaps
are surfaced and
remediated before
auditors ever find them.

50%

lower audit costs
by replacing last-
minute prep with
always-on visibility and
audit-ready evidence.

Step 2: Prioritize what drives risk powered by TrueRisk™

Apply AI-driven, risk-based scoring enriched with ATT&CK and ransomware context to focus teams on the control failures that pose the highest business impact.

Step 3: Remediate at scale with Audit Fix

Audit Fix helps accelerate remediation response with pre-built scripts, auto-fix capabilities, and ITSM-integrated workflows that turn insights into immediate, measurable action.

Step 4: Report with audit-ready precision

Generate executive-level reporting mapped to 100 plus frameworks with on-demand audit evidence that eliminates manual preparation.

Step 5: Monitor continuously with no blind spots

Maintain always-on visibility with continuous gap detection and automated evidence collection, ensuring compliance is never a point-in-time exercise.

Deliver Compliance at Machine Speed with AI

Compliance should not be a periodic exercise in documentation. It should be a continuous system of assurance. Qualys Policy Audit transforms compliance from a reactive audit burden into a proactive, always-on capability that reduces risk, lowers cost, and proves control effectiveness in real time. When compliance is powered by AI and operates at machine speed, audit readiness is no longer an event; it becomes your default state.
