TruRisk Eliminate™ 2.0
with **TruConfidence™**

Autonomous RemOps for Cyber Risk Reduction

Built on Qualys TruRisk Platform, TruRisk Eliminate 2.0 is the Autonomous RemOps platform that continuously eliminates cyber risk. TruConfidence, its AI-powered remediation intelligence layer, decides the safest way to eliminate every exposure. Agent Sara, Qualys' autonomous AI agent for risk remediation, then carries out that decision in controlled waves, and ensures the business stays resilient.

TruConfidence Determines. Agent Sara Acts.

Predict the safest remediation path before deployment, control every rollout, and prove systems stayed healthy after every change with confidence.

Before Deployment Determine the safest path	**During Rollout** Control how remediation rolls out	**After Every Remediation** Prove the change held
AI-Powered Patch Reliability Scoring: Predicts patch success using real-world deployment telemetry enabling reliable patches and low-impact applications to deploy automatically, and uncertain patches to move through controlled validation.	**Intelligent Remediation Waves:** Automatically sequence deployments from zero-touch remediation to ring-based validation, expanding only when results support the next wave.	**Operational Resiliency:** Monitors system health after deployment. Stable changes continue; anomalies pause the rollout and trigger rollback.
Patchless Remediation: When patching is unavailable or operationally risky, applies alternative actions including mitigation, software removal, custom scripts, or host isolation.	**Operator is always in Control:** Configuration flexibility ensures human operator is always in control, and can review and approve agent actions as the deployment progresses across waves.	**AI-Powered Patch Failure Analysis:** Explains failed remediations in plain language, identifying issues and recommending corrective action.
Third-Party Control Intelligence: Uses existing security controls to apply mitigations while permanent fixes are validated.		

Across the Attack Surface - Remediation wherever exposure exists

Agentless Edge & Perimeter Remediation: Extends remediation to edge and perimeter devices where an agent can't be installed, using existing authentication records and no new setup.

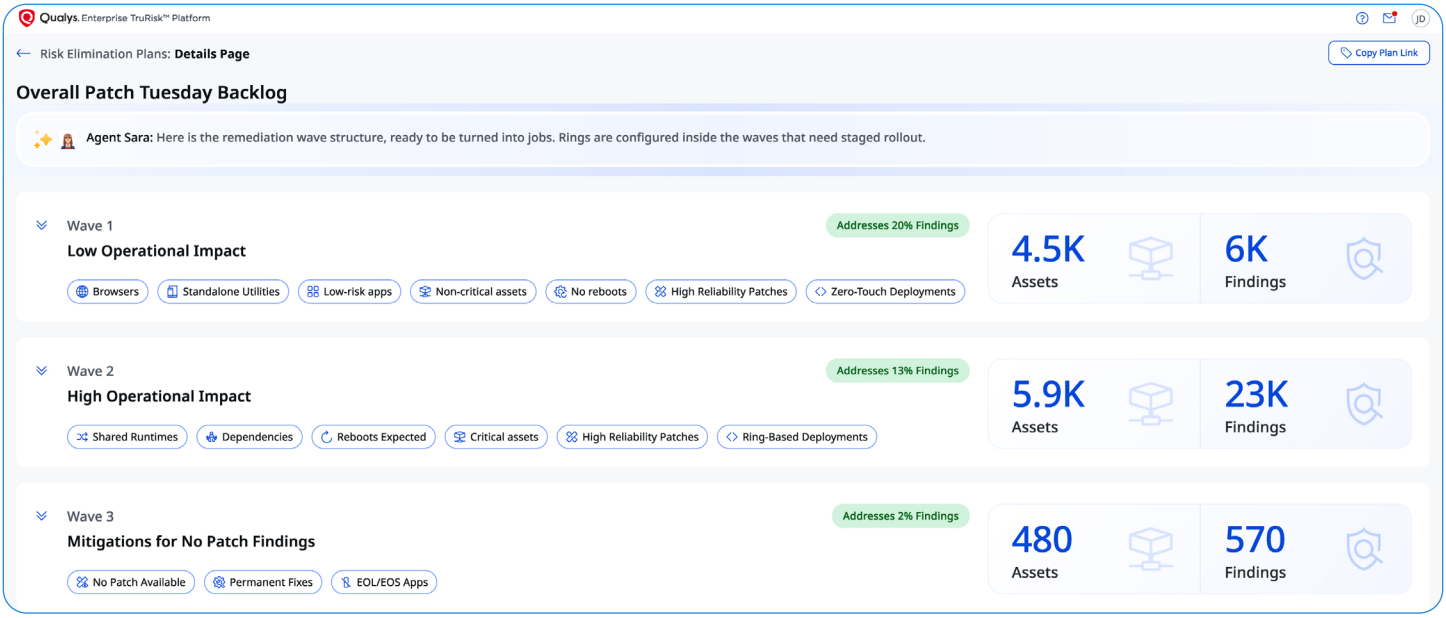

Proven at Scale

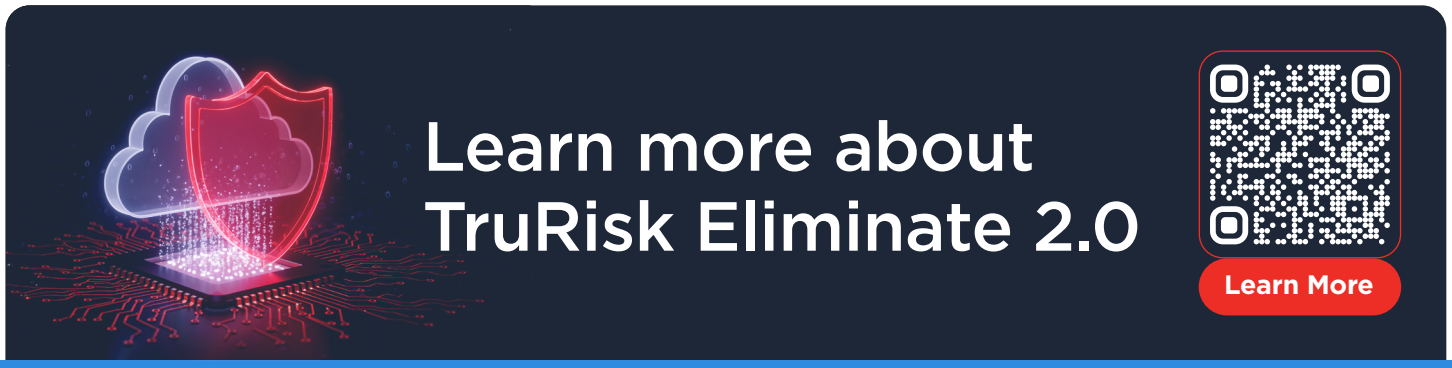

170M+
patches deployed in the last 12 months

94M
automated remediations

<0.1%
rollback rate

3.5x
faster remediation than non-customers

About Qualys

Qualys, Inc. (NASDAQ: QLYS) is a pioneer and leading provider of disruptive cloud-based Security, Compliance and IT solutions with more than 10,000 subscription customers worldwide, including a majority of the Forbes Global 100 and Fortune 100. Qualys helps organizations streamline and automate their security and compliance solutions onto a single platform for greater agility, better business outcomes, and substantial cost savings. Qualys, Qualys VMDR® and the Qualys logo are proprietary trademarks of Qualys, Inc. All other products or names may be trademarks of their respective companies.
