

The New TotalCloud

De-risk Your Cloud & Containers

Introducing the new Qualys TotalCloud AI-Native Cloud Risk & Resilience

Your journey from cloud-native to AI-native has redefined the battlefield. The attack surface is no longer just infrastructure; it's a dynamic web of identities, data, APIs, and autonomous pipelines. Traditional CNAPP platforms, built for static visibility and compliance snapshots, can't keep pace. Visibility alone doesn't stop exploitation and snapshots don't protect AI.

Qualys TotalCloud was selected as one of only three Leaders for the Forrester Wave™: CNAPP, Q1 2026. Our latest version goes one step further to redefine cloud security for this new era. We're shifting the paradigm from passive posture management to real-time risk elimination. TotalCloud unifies runtime-first exploitation defense (CDR), autonomous risk operations, and AI-native supply chain security—from code to cloud—all within a single platform.

We provide identity- and data-aware exposure analysis with integrated attack path intelligence, enabling you to see and stop threats before they materialize. This is not about adding more alerts to your queue; it's about delivering fewer incidents. It's not another dashboard; it's autonomous risk reduction.

Noise Cancelling CDR

- Comprehensive coverage (endpoint network cloud)
- Asset-centric TruRisk-ranked detections, noise canceling response
- Exploit confirmation

CSMP & AI-Powered Remediation

- Solving for resiliency in the AI-native era
- LLM node with cloud SOAR to customize any last mile remediation in seconds

DevOps Security for AI/LLM Threats

- Conversational AI with shift left solutions like QScanner
- Code-aware runtime detections
- Unified SAST + cloud risk view

DSMP & Identity Awareness

- Ability to protect sensitive data
- Includes model training data at risk with TruRisk contextual information

Qualys TotalAppSec & TotalAI Integration

- Protect AI supply chain with comprehensive AI software detection in images
- Cloud-native aware DAST scanning

Secure Your Cloud Journey with Qualys TotalCloud
