Qualys

SOLUTION BRIEF

TruRisk Eliminate™

Zero-Day Remediation at Machine Speed

Built on the Qualys Platform, TruRisk Eliminate goes beyond patching to eliminate the full vulnerability backlog. Leveraging autonomous AI agents, it remediates every exposure at machine speed, rolling out in reliability-scored waves to maintain operational resiliency. It can be deployed as a primary solution or alongside existing tools, with seamless workflow and ITSM integration.

Key Capabilities

AI-Powered Patch Reliability Scoring Analyzes large volumes of real-world patch deployment telemetry to predict patch reliability, enabling teams to predict outcomes before deployment.	**Autonomous remediation in waves** Agent Sara provides the remediation recommendations, starting from easy fixes to higher-riskchanges for controlled-phased rollouts.	**Patchless Patching** Remediates exposure even without a vendor patch, through fix, mitigate, uninstall, isolate, or custom actions.	**Built-In Rollback** Built-in safety net that reverses any remediation that doesn't behave as expected.

Patchless Remediation

When a patch doesn't exist, or isn't safe to apply, TruRisk Eliminate finds another way to eliminate exposure.

Mitigate Reduce exposure through controlled changes when patching is delayed or introduces risk	**Custom Script** Leverage a library of remediation scripts or create your own mitigations and remediations.	**Uninstall** Remove vulnerable or unauthorized software entirely when no fix or patch applies.	**Fix** Apply configuration-based fixes, validated by Qualys experts, when no patch exists.	**Isolate** Contain vulnerable assets to prevent threat spread without losing visibility or remote management as last resort.

Qualys.

SOLUTION BRIEF

Proven Results

150M+
patches deployed

40M+
autonomous remediations with **<0.1%** rollback rate

85%
exposure reduction

25x
faster patch delivery via P2P distribution

Bandwidth Optimization

P2P: in parallel, peer-to-peer, across every endpoint | **Caching with QGS**

> "Qualys finds it, analyzes it, and eliminates the risk automatically. The time and labor savings are huge."
>
> **Security Operations Manager, Cintas**
